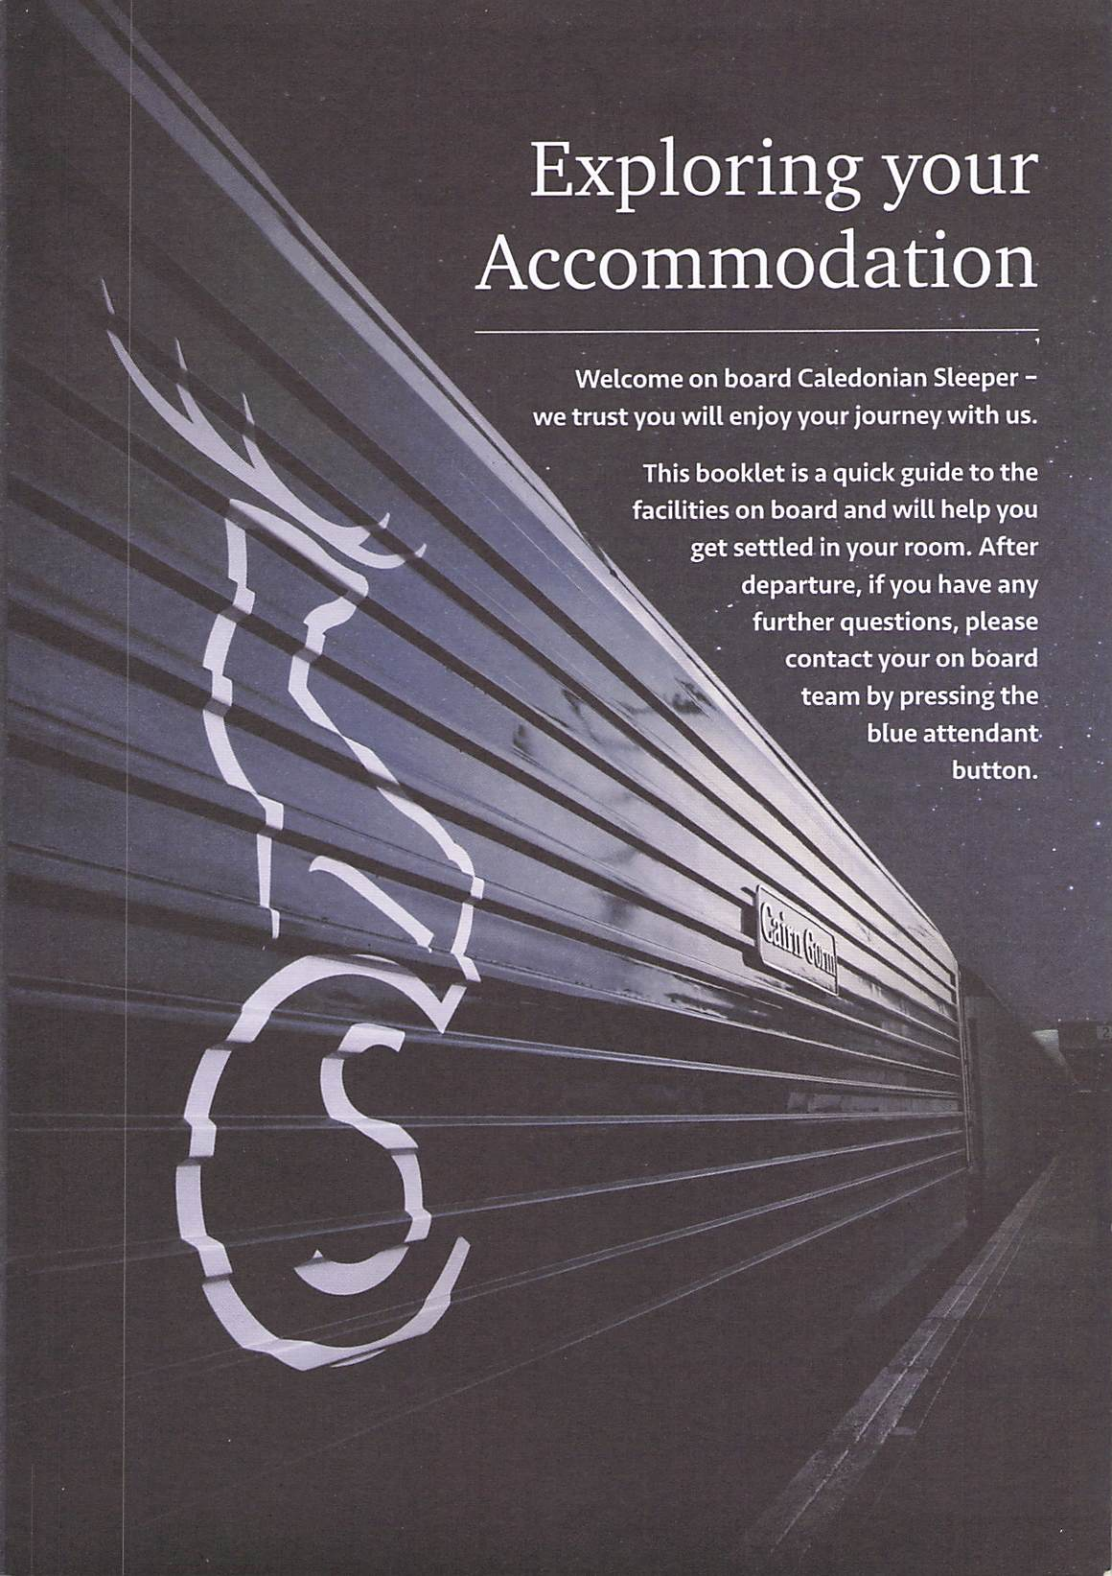
Exploring your Accommodation

Welcome on board Caledonian Sleeper – we trust you will enjoy your journey with us.

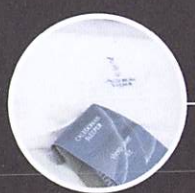
This booklet is a quick guide to the facilities on board and will help you get settled in your room. After departure, if you have any further questions, please contact your on board team by pressing the blue attendant button.



To open the blind, press down on the handle and gently pull it towards you.

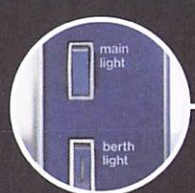
You will also find a complimentary bottle of water.

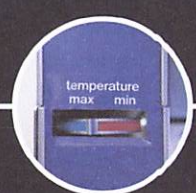
The room's sink, with hot and cold running water, can be found under the shelf in front of the window. A latch locks it in the upright position.



On your bed you'll find a towel and one of our Sleep Kits, complete with complimentary toiletries.

Toilets are at the end of the carriage. A sign outside your door will point you in the right direction.

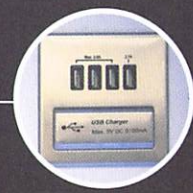




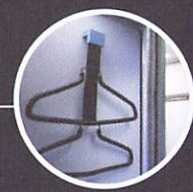
Next to the main door is a control panel for the room. This contains a main light switch, a smaller reading light, a temperature control dial and a blue attendant button, which you can press to call one of our On Board Hosts.

Located above the interconnecting door are two light switches. One is for dimmed light, and the other for the blue night light.

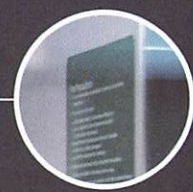
Above the window is a USB charging point.



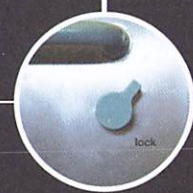
Near the mirror you will see clothes hangers. Next to these is an interconnecting door, which can be unlocked by your host if you have exclusive use of both rooms.



Next to the sink is a mirror and safety instructions, please read carefully prior to departure.



If you wish to lock your door when leaving your room, open the door, activate the lock and close the door behind you. Speak to an On Board Host to regain entry.



Breakfast

We would like to invite you to enjoy a Scottish breakfast with us. First class guests should complete the Breakfast Card, and hang it on the door handle outside your room within 30 minutes of departure.

Standard Class guests should complete the Breakfast Card and pass to your Sleeper Host with payment within 30 minutes of departure. Payment can also be made in the Lounge Car.

We will do our best to deliver your breakfast within your chosen time slot, although this may vary during busy periods.

On board Facilities

Toilets

A toilet is located at the end of each carriage. The sink water button and toilet flush are located on the floor, except for in the accessible toilet where the sink water is sensor operated and the toilet flush is on the wall panel. Water from taps is not suitable for drinking – bottled water is supplied in your room.

Lounge Car

The Lounge Car is available throughout your journey for food and beverages. During busy periods, seating may be limited and restricted to First Class guests only. However, a takeaway service is available at all times.

Thank you for choosing to travel with Caledonian Sleeper, we trust your trip will be a journey of a night time.
